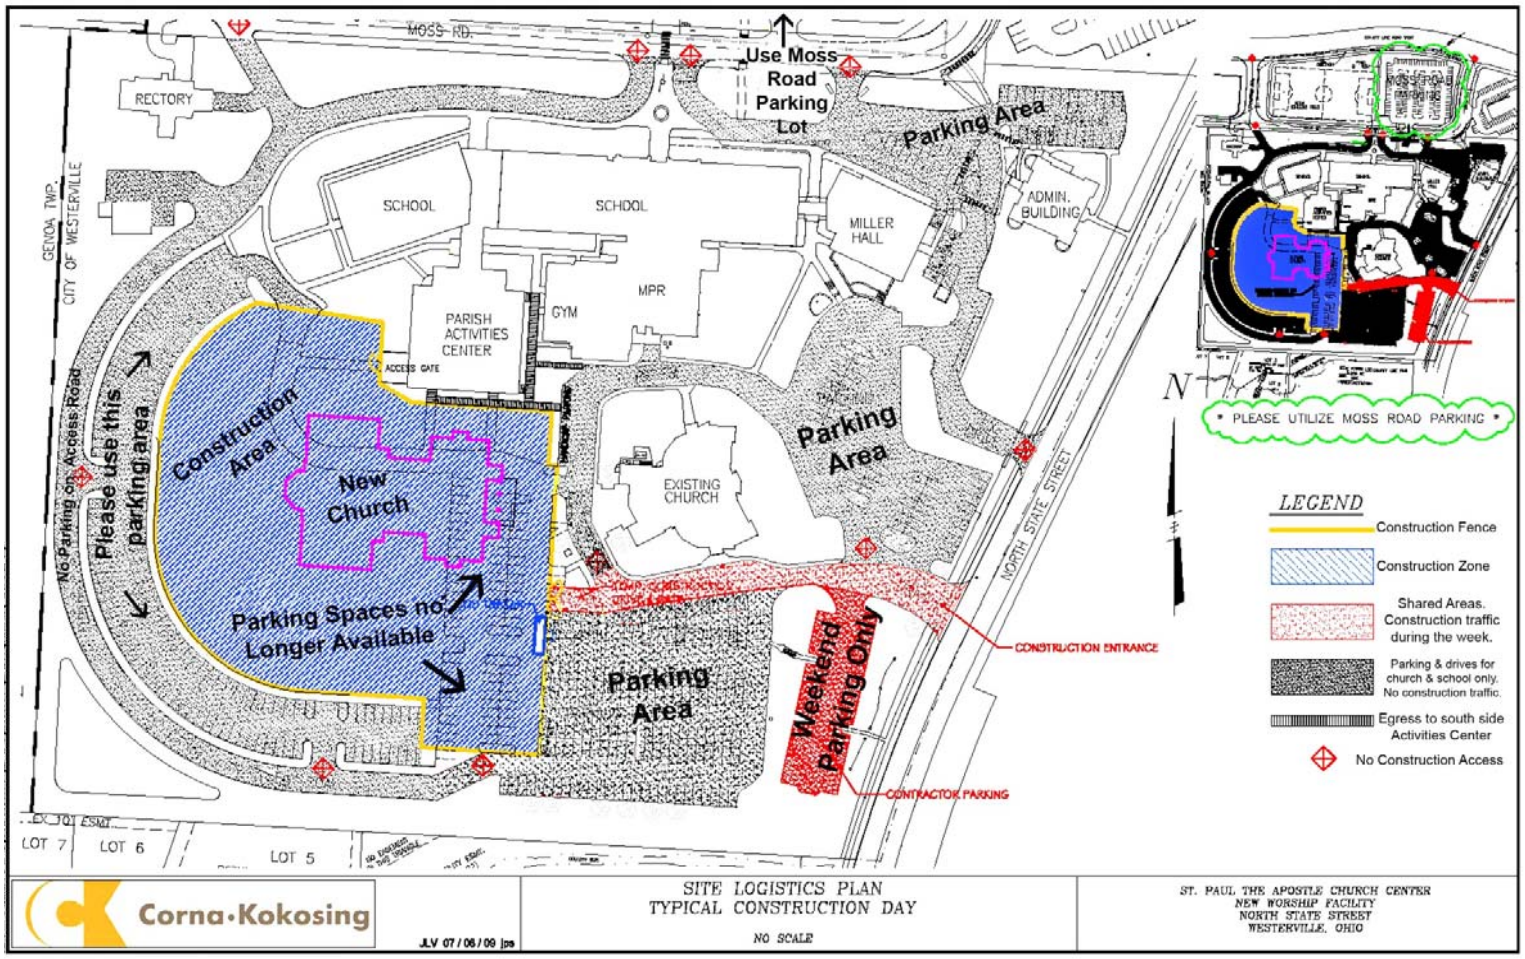
Construction Site Plan for Dirt Mound:



Starting the week of October 26 and for several weeks thereafter, the large dirt mound (blue shaded area) will be reworked in preparation for the new church. Even though the church construction cannot commence until we generate another $1.5 million in new pledges, Bishop Campbell has given us permission to begin this preliminary site work.

A construction fence will be erected around the work zone. Please review the site plan because approximately 70 parking spaces just west of the existing church entrance will no longer be available. Despite this inconvenience, ample parking is still available.

We recommend using the Moss Road parking lot directly across from the school. From that location, you can enter the school and easily access the Activities Center for Mass. We also suggest using the new parking lot west of the dirt hill – it is only a short walk to both the church and the Activities Center. Please do not park on the new access road located on the west end of the parish property. This road is for exiting and entering traffic only.

We encourage parishioners to arrive early for Mass. Thank you and God bless you for your generosity and patience.
